

1. As a mechanical engineering student who recently completed the first calculus course, which classes are recommended for my upcoming term?
2. Which mathematics course is required next for someone pursuing an electrical engineering degree?
3. Could you suggest a general education class that is guaranteed to be accepted for transfer credit at Cal Poly Pomona?
4. If my goal is to earn a degree in mechanical engineering, what does my overall course plan look like?
5. There are no seats left in the required physics course. What alternative classes will keep me on track for my degree?
6. My grade in the first calculus class was a D. Does this meet the prerequisite to enroll in the second calculus class for my major?
7. For the electrical engineering track, is it mandatory to enroll in physics and calculus concurrently, or am I allowed to finish the math requirement beforehand?
8. By completing differential equations during the autumn semester, which specific electrical engineering courses will become available to me in the spring?
9. Is it possible to schedule the statics class for the spring term if I have not yet completed the underlying physics requirements?
10. Which mandatory courses for the mechanical engineering pathway are strictly limited to the autumn term?
11. Will taking a break from coursework over the summer push back my expected transfer date to Cal Poly Pomona for the electrical engineering program?
12. Since I cannot get into either of my required math or physics courses this term, which other major-related classes should I register for to maintain my academic progress?
13. To reach the twelve-unit threshold for full-time status, which straightforward general education course pairs well with a schedule that already includes calculus and physics?
14. My transfer destination has shifted from Cal Poly SLO to Cal Poly Pomona. Does this change affect the sequence of math courses I need to complete?
15. Can you identify a humanities or arts course that fulfills local college graduation requirements while also articulating for electrical engineering credit at UCLA?

16. Having recently changed my major from biology to mechanical engineering, will the introductory chemistry class I previously took apply toward any requirements at Cal Poly Pomona?
